

QMI-QLI FRAMEWORK

Parametric Catalogue v2.1 FROZEN

Executive Methodological Specification
Complete English Catalogue of 286 Parameters
Formulas and Glossary

AGI FINANCE LAB

Original Author: Marzio Piovesan
Economic Owner: AGI Finance Lab OÜ
Freeze Date: 12 October 2026
Version: v2.1 FROZEN

Document Control

Field	Specification
Status	v2.1 FROZEN. Corrected candidate specification, ready for calibration on a development sample.
Origin	Derived from v2.0 with 50 direction corrections, a 26-column catalogue schema, and new calibration worksheets.
Freeze rule	Formulas, weights, directions and schema are locked. Any modification requires a new version and a Freeze Log entry.
Scope	286 parameters confirmed. Fourteen missing facets are documented and deferred to v3.0.
Core principle	Deterministic calculation. LLMs extract and classify evidence without modifying formulas, weights or thresholds.
Limitation	Candidate specification. Empirical calibration and validation are required.

Contents

- Part I – Executive Methodological Specification
- Part II – Complete English Catalogue of 286 Parameters
- Part III – QMI and QLI Formulas
- Part IV – Glossary
- Appendices – QLI Drivers, Validation Targets, Methodological Sources and Freeze Record
